DETAILED ACTION

1. Claims 1-15 are pending in the instant application and have been examined.

Terminal Disclaimer

2. The terminal disclaimer filed on May 21, 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 6,075,859 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 13 and 14 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

As for claim 13, the claim is directed towards a method for "mitigating a weakness" in the Cellular Message Encryption Algorithm (CMEA). As such, the claim limitations recite only method steps for the manipulation data. The claim is therefore directed towards a judicial exception to the statutory classes of invention eligible for a US Patent under 35 USC Sec. 101. The claim does not recite a limitation that represents a practical application of a judicial exception to 35 USC Sec. 101 since the

limitations are all directed only towards mathematical steps that may be useable in a larger mathematical algorithm.

Claim 14 is dependent on claim 13 and does not recite a limitation that cures any deficiency of claim 13. Therefore claim 14 is rejected on the same basis as claim 13.

Allowable Subject Matter

5. Claims 1-12 and 15 are allowed.
